PRODUCT: Flow 8000 40 D Heat interface unit

The Flow 8000 D heat interface unit features a Single-plate heat exchanger design for direct district heating, it delivers domestic hot water (DHW) at flow rates of 15 liters per minute. All models offer up to 15 kW of central heating output and come with the option of a heat meter. The Flow 8000's versatility is further enhanced by the availability of various optional accessories, making it suitable for multiple situations.

- The Flow 8000 D HIU product line includes models 40, 50, and 60
- Single PHE design for direct district heating
- Model variants available with or without heat meter
- DPCV included with all models
- Central heating capacity up to 15 kW
- Fast acting electronic control including return temperature limiter function
- Adapts for optimal performance in varying primary flow conditions
- Maximum differential pressure of 4.5bar
- Diehl Sharky-775 Ultrasonic, compact heat meter
- Available with 22mm compression or 3/4" flat face primary connections
- Built in strainers on primary and tertiary sides
- Fully insulated separate EPC inner case enclosing all major components
- Top and bottom connections available via vertical plumb accessory
- Optional flushing bypass
- 230VAC auxiliary power for metering & billing equipment
- Easy internal pre-payment cut-off connection
- Optional internal DHW over temp shut off valve for systems where primary flow is 70°C or more

Whilst it is always our intention to fully assist, it is essential to recognise that all information given by the company in response to an enquiry of any nature is provided in good faith and based upon the information provided with the enquiry. We recommend that advice should always be checked with your installer or contract partner. Consequently, the company cannot be held responsible for any liability relating to the use or repetition of such information or part thereof. In addition, whilst making every reasonable effort to monitor the performance and quality of our supply, installation, and service network, we do not accept responsibility for the workmanship or operation of any third-party company that the company may have promoted either in conversation, e-mail, or other communication. Similarly, the views and opinions expressed in communication with individuals within the company may not reflect that of the business as a whole. You can find this, and additional information on the Bosch commercial website at: www.bosch-thermotechnology.com/gb/en/commercial-industrial/home

Flow 8000 40 D Product dimensions and descriptions:

Example 1 Pre-fix and unit dimensions

Example 2 Component layout

- 1) DHW Control valve
- 2) Control unit
- 3) Heating control valve
- 4) Primary circuit air vent valve
- 5) Connection heat meter return (Optional)
- 6) Differential pressure control valve (DPCV)
- 7) Return temperature sensor NTC for heating circuit (Tertiary)
- 8) Flow temperature sensor NTC for heating circuit
- 9) Heat meter, 130mm x G1" / 110mm x G3/4" (Optional)
- 10) Drain valve, or accessory thermal bypass (Optional)
- 11) Heating circuit drain valve, Flow
- 12) Heating circuit drain valve, Return
- 13) Heating circuit return connection (22mm compression)
- 14) Heating circuit flow connection (22mm compression)
- 15) Primary circuit return connection (22mm compression) *
- 16) Primary circuit flow connection (22mm compression) *
- 17) Domestic hot water connection (22mm compression)

* 3/4" Flat face option available

** Required if primary flow temperature is 70°C or greater

- 18) Cold water connection (22mm compression)
- 19) Primary circuit drain valve and strainer
- 20) Heat meter flow sensor connection (M10x1)
- 21) Flow temperature sensor NTC primary circuit
- 22) Over temp shut off valve (Option) **
- 23) Adapter for cold water meter (Optional)
- 24) NTC temperature sensor DHW
- 25) Water hammer arrestor (Optional)
- 26) Cold water outlet (Optional)
- 27) Flow turbine and limiter with strainer
- 28) DHW plate heat exchanger (brazed stainless steel)
- 29) DHW air vent valve

Whilst it is always our intention to fully assist, it is essential to recognise that all information given by the company in response to an enquiry of any nature is provided in good faith and based upon the information provided with the enquiry. BOSCH

Flow 8000 40 D clearances & ventilation:

Example 3 Minimum product clearances & ventilation

Example 4 Maintenance clearances

- Temperature within a cabinet must not exceed 35°C.
- Provide ventilation openings at the top and bottom of the cabinet that are at least 240cm².
- Minimum maintenance clearance must be 600mm in front of the heat interface unit to allow for any maintenance that may be required.

Flow 8000 Heat meter:

Diehl Sharky 775 Compact energy meter

- Ultrasonic heat meter
- Measuring accuracy EN 1434 MID Class 2
- 3.6 VDC D-cell battery, up to 16 years lifetime
- Wired and wireless M-Bus as standard
- Additional connectivity modules available
