

MLC Landlord Wireless Controller

Consort Claudgen's LC Landlord Control Heating System is an ideal heating system for student accommodation, hotels, or anywhere where a central control unit is required to control the temperature of all heaters in a building or rooms.

It consists of an MLC controller and one or more LC controllers connected to Consort's RX or SL heaters. The MLC can control any number of LC depending on the building construction. It sets the same 7-day programme with 6 time settings per day for all LC controllers.

- Mains powered
- Controls an unlimited* number of LC controllers
- Sets the same 7-day programme and time for all LC controllers
- 2 operating modes:
 - 7-day programme – When the temperature on LC controller is adjusted, the new temperature is maintained until the next programme overrides it.
 - Constant temperature – When the temperature on LC controller is adjusted, the new temperature is maintained for the landlord set period of up to 4 hours. It then reverts to the fixed temperature.
- Simple to set up and easy to programme
- Large backlit LCD display for easy reading
- Stylish and sleek modern design
- Option to limit min/max temperature
- Temperature display of either degrees Celsius or Fahrenheit

Dimensions (mm):

Model No.	Height	Depth	Width
MLC	89	23	136

* Only limited by building construction.
