

SLEXT Receiver Unit & Range Extender

As a receiver unit, the SLEXT enables certain heaters to be wirelessly controlled by a CRXSL or SL controller. With SLEXT installed, a CRXSL or SL controller expands the heating control options to include temperature and time control.

As a range extender, the SLEXT extends the RF signal range SL heaters that are not close enough to receive wireless transmission. It is surface mountable and easy to install.

- Mains powered.
- Can control load up to 3kW.
- Maximum switching current 13A/250V.
- Can be retrofitted.
- Each heater must be connected to an SLEXT for it to be controlled by a CRXSL or SL controller.
- Multiple heaters can be controlled by a separately purchased CRXSL or SL controller.
- Can double the range of all SL or CRXSL controllers.
- Simple pairing to controller and heaters.
- Dimensions (mm):- H: 82 D: 57 W: 80
