

NEOMITIS®

Creating innovative solutions for ambient comfort

# Digital room thermostats Timer and programmers

By installing a thermostat, timer or programmer you could save up to £165 per year. With our easy to use controls, turning your thermostat down by 1°C can save up to 10% of your energy bill.

Take control! The right temperature all the time, available in wireless or wired version with daily and weekly programming

Boiler Plus

# Boiler Plus legislation

## Improve energy efficiency in the home and preserve comfort

The new range of Neomitis thermostats are smart controls with automation and optimisation features, explained below:

### Dual optimisation feature:

OPTI ECO or OPTI COMFORT, we design smart products to make your life easier. Optimize your programming by favouring comfort or savings: Depending on various parameters: room inertia, ambient temperature, desired temperature, the thermostat calculates and optimizes the programming for each heating period whether set to Comfort or Savings (Eco):

- In **OPTI ECO mode**: The thermostat's inbuilt algorithm optimizes in order to guarantee maximum energy savings throughout the ECO programme.

In this mode, a slight drop in the temperature level at the beginning and end of the ECO period is allowed to maximize energy savings.

- In **OPTI COMFORT mode**: The processor within the device starts the

boiler operation at the optimum time to achieve the set point temperature at the start of the occupancy period without sacrificing comfort. The thermostat's inbuilt algorithm optimizes in order to guarantee maximum energy savings throughout the COMFORT programme.

**Automation feature:** flexible programming and easy modification to combine comfort and savings.

- Single day or multiday programming.
- Programmable comfort periods.

Wired and wireless smart digital room thermostats  
available in weekly programming

# RT7RFPLUS & RT7PLUS & RT7SD PLUS

Table stand  
RF version

RT7SD PLUS  
Mains powered version

## Benefits

- + Dual optimisation feature.
- + Automation: flexible programming and easy modification to combine comfort and savings.
- + Quick and easy to install.
- + No batteries required (RT7SD PLUS only).
- + Suitable for all heating applications.
- + Large and easy to understand display.
- + Easy to turn rotary control.
- + Flexible programming and easy modification to combine comfort and savings.
- + Boost mode for immediate comfort.
- + Energy savings from PID control.

- + Service interval capable.
- + Program lock.

### Wireless RF version

- + No cable to install, which means no decorative repair or flooring to disturb.
- + Reliable RF transmission makes it an ideal solution being easy to install.
- + Heating status indication at thermostat and RF receiver.
- + RF signal indicator.
- + Signal Strength Test Feature.

Designed  
in France

3 years  
warranty

Suitable for all  
heating applications

Wired and wireless digital room thermostats  
available in daily programming

# RTORF & RTO

Table stand  
RF version

RTORF

RTO

## Benefits

- + Quick and easy to install.
- + Suitable for all heating applications.
- + Large and easy to understand display with backlight.
- + Easy to turn rotary control.
- + Flexible programming and easy modification to combine comfort and savings.
- + Boost mode for immediate comfort.
- + Energy savings from PID control.
- + Service interval capable.

### Wireless RF version

- + No cable to install, which means no decorative repair or flooring to disturb.
- + Reliable RF transmission makes it an ideal solution being easy to install.
- + Heating status indication at thermostat and RF receiver.
- + RF signal indicator.
- + Signal Strength Test Feature.

Designed

Wired and wireless 7 day digital timers  
Wired and wireless programmers

# PRG7 RF & TMR7 RF TMR7 & PRG7

## Benefits

- + Quick and easy to install, universal mounting: fits on most existing wall plates on the market.
- + Available in one channel (TMR7 and TMR7 RF) and two channels (PRG7 and PRG7 RF) configurations; so the right model is always available.
- + PRG7 and PRG7 RF suitable for all boiler systems (both Gravity and Pumped), TMR7 RF suitable for all heating applications.
- + Large, easy to read display with white backlight.
- + Easy slide controls for programming and mode selection.
- + Optimisation feature (TMR7 RF).
- + Flexible programming and easy modification to combine comfort and savings.
- + Boost and Advance modes at the push of a button.

- + Built in temperature sensor for frost protection in garages and un-insulated locations.
- + Service interval capable.
- + Energy savings from PID control (TMR7 RF).

### Wireless RF versions

- + No cable to install, which means no decorative repair or flooring to disturb.
- + Reliable RF transmission makes it an ideal solution being easy to install.
- + Heating status indication at thermostat and programmer.
- + RF signal indicator.
- + Signal Strength Test Feature.

Designed in France

3 years warranty

Suitable for all heating applications

Energy class TMR7 RF only

PID technology TMR7RF

Boiler + compliant TMR7 RF only
